INDIGO EXPLORATION INC.

(An Exploration Stage Company)

NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS

For the three and nine months ended June 30, 2012 and 2011

(Unaudited – expressed in Canadian dollars)

1 ORGANIZATION AND NATURE OF OPERATIONS

Indigo Exploration Inc. (“the Company”) is in the business of the acquisition, exploration and evaluation of mineral properties, and either joint venturing or developing these properties further or disposing of them when the evaluation is completed. The Company is listed for trading on the TSX Venture Exchange under the symbol “IXI”. At June 30, 2012, the Company was in the exploration stage and had interests in properties located in Burkina Faso, West Africa. The Company’s corporate head office is located at Suite 880 – 580 Hornby Street, Vancouver, British Columbia, Canada.

2 GOING CONCERN

These condensed interim consolidated financial statements have been prepared on a going concern basis, which assumes that the Company will be able to meet its obligations and continue its operations for the next twelve months. Realization values may be substantially different from carrying values as shown and these financial statements do not give effect to adjustments that would be necessary to the carrying values and classification of assets and liabilities should the Company be unable to continue as a going concern. Such adjustments could be material. At June 30, 2012, the Company had not yet achieved profitable operations, had an accumulated deficit of \$2,803,305 since inception and expects to incur further losses in the development of its business, all of which may cast significant doubt upon the Company’s ability to continue as a going concern and, therefore, that it may be unable to realize its assets and discharge its liabilities in the normal course of business. The Company’s ability to continue as a going concern is dependent upon its ability to obtain the necessary financing to develop the mineral properties and to meet its ongoing levels of corporate overhead and discharge its liabilities as they come due. Although the Company has been successful in the past in obtaining financing, there is no assurance that it will be able to obtain adequate financing in the future or that such financing will be on terms advantageous to the Company.

3 BASIS OF PRESENTATION AND ADOPTION OF INTERNATIONAL FINANCIAL REPORTING STANDARDS

The Company prepares its financial statements in accordance with Canadian generally accepted accounting principles (“Canadian GAAP”) as set out in the Handbook of the Canadian Institute of Chartered Accountants (“CICA Handbook”). In 2010, the CICA Handbook was revised to incorporate International Financial Reporting Standards (“IFRS”) and require publicly accountable enterprises to apply such standards effective for years beginning on or after January 1, 2011. Accordingly, the Company commenced reporting on this basis in its 2012 interim consolidated financial statements. In these financial statements, the term “Canadian GAAP” refers to Canadian GAAP before the adoption of IFRS.

These condensed interim consolidated financial statements have been prepared in accordance with IFRS applicable to the preparation of interim financial statements, including IAS 34, Interim Financial Reporting, and IFRS 1, First-time Adoption of International Financial Reporting Standards. The accounting policies followed in these condensed interim consolidated financial statements are the same as those applied in the Company’s condensed interim consolidated financial statements for the three months ended December 31, 2011. The Company has consistently applied the same accounting policies throughout all periods presented, as if these policies had always been in effect. Note 11 discloses the impact of the transition to IFRS on the Company’s reported statement of financial position as at June 30, 2011 and the loss and comprehensive loss for the three and nine months ended June 30, 2011, including the nature and effect of significant changes in accounting policies from those used in the Company’s consolidated financial statements for the year ended September 30, 2011.

INDIGO EXPLORATION INC.

(An Exploration Stage Company)

NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS

For the three and nine months ended June 30, 2012 and 2011

(Unaudited – expressed in Canadian dollars)

The accounting policies applied in these condensed interim consolidated financial statements are based on IFRS effective for the year ending September 30, 2012, as issued and outstanding as of August 29, 2012, the date the Board of Directors approved the statements. Any subsequent changes to IFRS that are given effect in the Company's annual consolidated financial statements for the year ending September 30, 2012 could result in restatement of these condensed interim consolidated financial statements including transition adjustments recognized on change-over to IFRS.

The condensed interim consolidated financial statements should be read in conjunction with the Company's Canadian GAAP annual consolidated financial statements for the year ended September 30, 2011, and the Company's condensed interim consolidated financial statements for the three months ended December 31, 2011 prepared in accordance with IFRS applicable to interim financial statements.

The preparation of financial statements requires management to use judgement in applying its accounting policies and estimates and assumptions about the future. Estimates and other judgements are continuously evaluated and are based on management's experience and other factors, including expectations about future events that are believed to be reasonable under the circumstances.

The most significant accounting judgements and estimates that the Company has made in the preparation of the condensed interim consolidated financial statements relate to the assessment of impairment to the carrying value of mineral properties, estimation of restoration provision, the determination of the likelihood that future income tax benefits can be realized, and the assumptions used in calculating the fair value of warrants and share-based payments.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and further periods if the review affects both current and future periods.

5 MINERAL PROPERTIES (Schedule 1)

Title to mineral properties involves certain inherent risks due to the difficulties of determining the validity of certain claims as well as the potential for problems arising from the frequently ambiguous conveyancing history characteristic of many mineral properties. The Company has investigated title to its mineral properties and, to the best of its knowledge, title to its properties are in good standing.

INDIGO EXPLORATION INC.

(An Exploration Stage Company)

NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS

For the three and nine months ended June 30, 2012 and 2011

(Unaudited – expressed in Canadian dollars)

The recoverability of amounts shown as mineral properties is dependent upon the conversion of mineral resources to economically recoverable reserves, the Company's ability to obtain financing to develop the properties, and the ultimate realization of profits through future production or sale of the properties.

Pursuant to the Mining Code of Burkina Faso, an exploration permit holder is required to incur 270,000 West African CFA Francs (\$531) of exploration expenditures per square kilometre per year in order to maintain its permits in good standing. If such expenditures are not incurred, the Government of Burkina Faso may, at its discretion, cancel the permits after giving the permit holder sixty days notice to remedy any deficiency. At June 30, 2012, the Company had not incurred sufficient expenditures on its Loto and Tordo permits to comply with the Mining Code of Burkina Faso. However, the Government of Burkina Faso has renewed the Loto permit and has not issued the Company any notice of non-compliance. The Company is in the process of renewing the Lati and Tordo permits. Sufficient expenditures have been incurred on the Kodyel, Moule and Lati permits. The Company believes its Burkina Faso permits are in good standing.

Kodyel Exploration Permit and Other Permits

Pursuant to the acquisition of Sanu Burkina Faso S.A.R.L. on June 30, 2010, the Company acquired gold mineral properties located in Burkina Faso, Africa. The permits acquired were the Kodyel Exploration Permit, the Tordo Exploration Permit, the Lati Exploration Permit and the Loto Exploration Permit. The Company has no significant commitments with respect to these permits other than compliance with the Mining Code of Burkina Faso.

A border dispute between Burkina Faso and Niger has limited the Company's access to the northeastern portion of the Kodyel Property. The new Kodyel Exploration Permit issued has a reduced area, eliminating the area subject to the border dispute. The new permit retains a right of first refusal to include this excluded area once the World Court has finalized the border location. The book value of the reduced area (\$54,000) was written-down during the year ended September 30, 2011.

Moule Gold Permit, Burkina Faso

On May 5, 2010, the Company entered into an option agreement to acquire a 100% interest, subject to a 1.5% net smelter return ("NSR") royalty, in the Moule Gold Permit, in western Burkina Faso, in consideration for cash payments totalling US\$410,000 over a three year period as follows:

- A. US\$50,000 on May 5, 2010 (paid);
- B. US\$60,000 on or before May 5, 2011 (paid);
- C. US\$100,000 on or before May 5, 2012 (during the six months ended June 30, 2012, the Company entered into an amending agreement to extend the payment into four payments as follows: US\$5,000 on April 30, 2012 (paid); US\$35,000 on or before May 31, 2012 (paid); US\$35,000 on or before August 31, 2012; and US\$30,000 on or before November 30, 2012);
- D. US\$200,000 on or before May 5, 2013.

The Company has the right to purchase the entire 1.5% NSR royalty for US\$1,800,000.

Bada Gold Permit, Burkina Faso

On April 16, 2012, amended on June 22, 2012, the Company entered into an option agreement to acquire a 100% interest in the Bada Gold Permit, in northeast Burkina Faso, in consideration for cash payments totalling US\$92,000 over a three year period as follows:

- A. US\$2,000 on April 16, 2012 (paid);
- B. US\$12,500 on June 22, 2012 (paid);
- C. US\$12,500 on or before December 15, 2012;
- D. US\$30,000 on or before April 16, 2013; and,

7 SHARE CAPITAL

- a) Authorized:

Unlimited common shares without par value.

- b) Stock options

Stock option plan

The Company has a stock option plan (the “Plan”) whereby the maximum number of shares reserved for issue under the plan shall not exceed 10% of the outstanding common shares of the Company, as at the date of the grant. The maximum number of common shares reserved for issue to any one person under the Plan cannot exceed 5% of the issued and outstanding number of common shares at the date of the grant and the maximum number of common shares reserved for issue to a consultant or a person engaged in investor relations activities cannot exceed 2% of the issued and outstanding number of common shares at the date of the grant. The exercise price of each option granted under the plan may not be less than the Discounted Market Price, as that term is defined in the policies of the TSX Venture Exchange.

Options may be granted for a maximum term of ten (10) years from the date of the grant, are non-transferable and expire within a reasonable period following the termination of employment or holding office as director or officer of the Company and, in the case of death, expire within one year thereafter.

Notes to reconciliations

The following paragraphs explain the significant differences between Canadian GAAP and the current IFRS accounting policies applied by the Company.

i) Flow-through shares

Under Canadian GAAP, the entire net proceeds from the issuance of flow-through shares were recognized in equity. Upon renunciation of the tax benefits associated with the related expenditures, a deferred tax liability was recognized and shareholders' equity reduced.

Under IFRS, proceeds from the issuance of flow-through shares are segregated as follows: the estimated premium investors pay for the flow-through feature, if any, is recorded as a flow-through tax liability; and, the remaining net proceeds are recorded as share capital. Upon renunciation of the tax benefits associated with the related expenditures and as qualifying expenditures are incurred, a deferred tax liability is recognized and the flow-through tax liability is reversed with any difference being recorded as a deferred tax recovery (expense).

NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS

For the three and nine months ended June 30, 2012 and 2011

(Unaudited – expressed in Canadian dollars)

To the extent that suitable deferred tax assets are available, the Company will reduce the deferred tax liability and record a deferred tax recovery.

At June 30, 2011, share capital decreased by \$13,200 and deficit (deferred tax recovery in prior years) decreased by \$13,200.

ii) Acquisition of Sanu Burkina Faso S.A.R.L. – deferred income tax liability

On June 30, 2010, the Company acquired 100% of the issued and outstanding shares of Sanu Burkina Faso S.A.R.L. Under Canadian GAAP, the transaction was accounted for using the purchase method of accounting as an acquisition of assets by the Company. As a result of the difference between the purchase price of the net assets acquired and the tax base of those net assets, an iterative calculation was performed in order to record a \$165,000 future income tax liability.

Under IFRS and in accordance with IAS 12 “Income taxes”, a deferred income tax liability on net assets acquired outside of a business combination is exempt from initial recognition. No deferred income tax liability would be recorded under IFRS on acquisition of Sanu Burkina Faso S.A.R.L.

At June 30, 2011, mineral properties decreased by \$165,000 and deficit (deferred tax recovery in prior years) increased by \$165,000.

iii) Write-down during the year ended September 30, 2011

During the year ended September 30, 2011, the Company recorded a write-down of mineral properties of \$72,000. The write-down was based on the book value of mineral properties at the date of the write-down. As a result of the IFRS transitional adjustment to reduce mineral properties by \$165,000 (ii), the write-down during the year ended September 30, 2011 must be reduced proportionally.

At September 30, 2011, mineral properties increased by \$18,000 and during the year ended September 30, 2011, net loss and comprehensive loss decreased by \$18,000.

Statement of Cash Flows

The IFRS transition adjustments noted above did not have an impact on cash and cash equivalents.
